Open to Remote / Relocation Globally

PROFESSIONAL SUMMARY

Mobile Application Engineer with 5+ years of experience delivering scalable, production-grade Flutter/Dart applications from design through App Store & Play Store deployment. Proven track record of improving app performance by 20%, building offline-first architectures, integrating complex Firebase/Supabase/REST backends, and writing tested, CI/CD-deployed production code. Expanding expertise in Kotlin, Jetpack Compose, and AI integration for Flutter. Seeking a high-impact mobile engineering role to build world-class products at scale.

TECHNICAL SKILLS

Languages: Dart, Kotlin, Python, PHP, JavaScript

Mobile Frameworks: Flutter, Flutter SDK, Jetpack Compose, React.js

Architecture & Patterns: Clean Architecture, BLoC (flutter_bloc), MVC, MVVM, Offline-First Design

Backend & Databases: Firebase (Auth, Firestore, Cloud Functions), Supabase, Hive (Local Storage), REST APIs

Testing & Quality: Unit Testing, Widget Testing, flutter_test, TDD principles

DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), CI/CD Pipelines, Android Studio, VS Code, Xcode, Postman, Figma, Claude, Antigravity

Deployment: Google Play Store, Apple App Store Connect, Google Play Console, Firebase Console

PROFESSIONAL EXPERIENCE

Freelance / Independent Tech Consultant | Remote

2024 – Present

- Built and shipped a full-stack Vendor Payment Management System (VPMS) for Royal India Vacation using Flutter + Supabase with Clean Architecture and BLoC — covering multi-role workflows (Admin, Employee, HOD, MD, Accounts), expense lifecycle management, bill/payment screenshot uploads, dashboard drill-downs, and Supabase RLS policies. Deployed on mobile and Flutter Web (Vercel).
- Set up GitHub Actions CI/CD pipeline for automated build and deployment workflows on VPMS, and wrote unit and widget tests (flutter_test) covering core business logic in the BLoC layer.
- Developed and shipped Current Diary, a School ERP application live on the Apple App Store — enabling schools to manage attendance, timetables, fee records, and communications across student, teacher, and admin roles.
- Contributed to Swirl Wines, a Sweden-based wine discovery app on the Google Play Store — implementing Flutter UI features and integrating backend APIs for wine cataloguing and user personalisation.
- Delivered professional school websites for clients, including Flowerdale School (Dehradun) and Sanwal School (Nainital), handling end-to-end development and deployment.
- Currently integrating AI capabilities into Flutter — building a personal RAG Assistant app (Retrieval-Augmented Generation) and exploring LLM-powered features for client applications.
- Expanding into native Android development with Kotlin, learning Jetpack Compose to complement cross-platform Flutter expertise.
- Architected production-ready Flutter applications leveraging Clean Architecture and BLoC state management, maintaining codebases with 0 critical bugs across release cycles.

Flutter Developer

2022 – 2023

Evonix Technologies | On-site

- Engineered and maintained multiple production Flutter applications using Clean Architecture principles, reducing codebase complexity and improving feature delivery speed by an estimated 30%.
- Improved application performance by 20% through targeted widget tree optimization, API call batching, and lazy loading strategies.
- Implemented BLoC state management patterns across apps, ensuring predictable state transitions and high testability of business logic, backed by unit and widget tests for critical modules.
- Contributed to CI/CD pipeline workflows (GitHub Actions) for automated builds and Play Store releases, alongside sprint planning and code reviews in an Agile/Scrum team.

- Integrated Firebase Authentication, Firestore, Cloud Messaging (push notifications), and REST APIs, delivering end-to-end feature ownership across multiple products.
- Published and maintained applications on Google Play Store; managed release cycles, versioning, and hotfix deployments with zero critical production incidents.

Software Developer (Full Stack)

2021 – 2022

Tree Multi Soft Services | On-site

- Developed and maintained full-stack web applications using PHP, Laravel, and React.js, delivering responsive, client-facing features on schedule.
- Initiated transition into mobile development by independently building Flutter prototypes, directly leading to Flutter Developer role at Evonix Technologies.
- Delivered scalable, well-documented features aligned with client requirements across multiple concurrent projects.

PROJECTS

Vendor Payment Management System (VPMS) – Royal India Vacation | Flutter, Supabase, BLoC, Clean Architecture, GoRouter, get_it, fpdfart

- Full-stack multi-role expense management platform (Admin / HOD / Employee / MD / Accounts) with payment lifecycle tracking, screenshot uploads, and real-time dashboard drill-downs. Deployed on mobile + Flutter Web. Live Demo
- Implemented Supabase RLS policies for role-based data access and FCM push notifications; built Flutter Web responsive layout for Vercel deployment.
- Configured GitHub Actions CI/CD pipeline for automated builds; added unit/widget test coverage for BLoC business logic.

Current Diary – School ERP App | Flutter, Firebase, BLoC, Clean Architecture

- Production School ERP app live on Apple App Store, managing attendance, timetables, fee records, and multi-role communication (student / teacher / admin). App Store

RAG Assistant App (In Progress) | Flutter, Python, LangChain, LLM APIs

- Personal AI integration project — building a Retrieval-Augmented Generation assistant that ingests documents and answers context-aware queries, exploring LLM APIs for Flutter client integration.

Swirl Wines – Wine Discovery App | Flutter, BLoC, REST APIs, Clean Architecture

- Sweden-based wine discovery and cataloguing app — contributed Flutter UI features and API integration for personalised wine recommendations and user collections. Published on Google Play Store. Play Store

School Website Projects | Web Development

- Delivered full client websites: Flowerdale School, Dehradun and Sanwal School, Nainital — end-to-end design, development, and deployment.

EDUCATION

Master of Computer Applications (MCA) 2018 – 2020

Graphic Era Hill University

Bachelor of Computer Applications (BCA) 2015 – 2018

Graphic Era Hill University
